**RE: Calculation of Rates & Surcharges – Effective October 10, 2014**

Dear MOL Customer:

Please be advised that MOL will adjust the formula used to calculate rates and surcharges for the Asia to United States and United States to Asia trade lanes effective October 10, 2014 as per below:

Asia to United States

*To determine the ocean freight or surcharges for a 20-foot standard container MOL will multiply the freight or surcharge of a 40-foot standard container by 90% (currently 80%) and round off to the nearest five dollars.*

United States to Asia

*To determine the ocean freight or surcharges for a 20-foot standard container MOL will multiply the freight or surcharge of a 40-foot standard container by 90% (currently 80%) and round off to the nearest dollar.*

Please note that formulas for all container sizes are available in the appropriate tariffs and are available on [MOLpower.com](http://MOLpower.com). If you have any questions, please contact your MOL sales representative. As always, we appreciate your business.

Sincerely,

MOL (America) Inc.
