Re: East Africa - 20 Foot Container Heavy Duty Surcharge - August 15th, 2007

Dear Our Valued Customers

Most likely you are aware of the fact that vessels have reached the maximum weight capacity recently due to increasing number of **Heavy 20 Foot Containers** on the westbound. This is causing liners to lose slots on the vessels.

In order to compensate for this unfortunate situation and enable us to provide high quality service, MOL has implemented the following **20 Foot Heavy Duty Surcharge (code:HVL)** on **East Africa (EAX)** WB service as follows:

Gross Container Weight *

< 14 tons

14 tons to < 20 tons

≥ 20 tons

HDS Surcharge

- no premium surcharge

- USD 100 / 20 foot

- USD 200 / 20 foot

This surcharge will start to be applied with effective BL date 15 August 2007.

* **Gross Container Weight = Cargo Gross Weight + Tare Container.**

With best regards,

MOL (Indonesia)
