Re: Asia Europe Trade - Norway NOx Surcharge

Dear Valued Customer,

on January 1st 2007, the Norwegian Government introduced a tax on NOx emission from fossil fuels for all sea-going vessels calling Norwegian ports.

Please be advised that MOL intends to recoup the cost of the Norwegian NOx levy by the application of a NOx Surcharge on cargoes transiting Norwegian ports.

The Surcharge will take effect immediately at a rate of EUR 20 per TEU.

Should you have any questions, please contact our local offices

Yours sincerely,

MOL (Indonesia)
